Customer Analysis

Repeat vs One-Time Customer

- 60%* of customers are repeat buyers*. This suggests they are likely to buy again. On the other hand, it also presents an opportunity for retention.

Order Frequency

- On average, a customer places 2 orders.
- The most active customers placed as many as 8 orders.

Time Gaps Between Repeat Purchases

- The time between repeat purchases is ~480 days. This low figure means this customer type is not likely to repeat buy large enough and offers a retention challenge.

Customer Segmentation

- Customers can be segmented into Low, Medium, High, and Top spenders based on order amount.
- Targeting High and Top tiers for loyalty programs can improve ROI.
